

WAGNERS

Composite Fiber Technologies (CFT)

ROAD BRIDGES

Wagners CFT have supplied road bridges across the globe from the sweltering tropics and burning deserts to sub-zero temperatures. Designed and built to local road authority standards, our full in-house design team work closely with clients to ensure a robust, fit for purpose and aesthetically pleasing road transport asset.

The unique durability, strength, corrosion-proof and termite proof properties of Wagners composite structures is perfect for coastal, marine and environmentally sensitive areas. Assembled in a controlled environment with precise tolerances and attention to detail, Wagners structures are a superior product. Possessing a full in-house design team, Wagners work closely with the client to ensure a robust, aesthetically pleasing road transport asset that will provide decades of service.

PERFORMANCE ADVANTAGES

- » Designed and built to local road authority standards
- » Quick and easy installation (modularized design)
- » Prefabrication and scheduled works delivery
- » Lightweight
- » Termite proof
- » Resistant to acid sulfate soils
- » Dispensable cathodic protection
- » Inert, environmentally stable material

WAGNERS COMPOSITE PRODUCTS WILL NOT RUST, ROT OR CORRODE ENSURING A LOW MAINTENANCE ASSET WITH A LONG LIFE SPAN.

Composite Fiber Technologies (CFT)

ROAD BRIDGES

SUPPLY OPTIONS

- » Asphalt, spray seal overlay or no additional surface (where concrete deck is a road surface)
- » Choice of barrier systems
- » Pour in-situ deck
- » Prefabricated deck
- » Fully composite or hybrid composite/concrete

WARRANTY

- » 100 year design life
- » Standard 7 year full replacement warranty
- » 40 years to first maintenance required on painted surfaces

WAGNERS CAN PROVIDE ON-SITE SUPPORT FOR INSTALLATION.
